Work History

Systems Administrator with Live Event Production focus

Jan 2023 to Current

Aptive Environmental - Provo, UT

- Brought corporate video production in-house, eliminating outside spend and saving Aptive ~\$75K annually.
- Produced live, multi-camera company-wide events end-to-end — quarterly YouTube Town Halls (50–4,000+ viewers), Encore Global Operations Summits, and monthly Technology and Sales all-hands
- Led pre-production, and post-production logistics for shoots and live events: run-of-show, equipment, and deliverable archival.
- Directed 3–10 person crews (camera, audio, lighting, graphics) and liaised between executives, marketing, and external partners.
- Technical director for weekly, monthly, and quarterly Zoom webinars: run-of-show and Q&A moderation.
- Deployed DaVinci Resolve remote render servers, cutting render times and unblocking the marketing content pipeline.
- Owned identity lifecycle and access management for 4,000+ users across Google Workspace via Okta SSO (SAML, SCIM, RBAC) — the same project management discipline applied to production: scope, schedule, stakeholders, hand-offs.
- Replaced a SaaS backup vendor with Synology NAS workflows, saving ~\$50K/year and improving legal hold and eDiscovery recoverability.
- Built API-driven automation against Google Workspace using GAM for provisioning, compliance reporting, and on-demand pull of meeting recordings for review and archival.
- Administered Slack as service owner and implemented Unifi networking across 74 field offices.

Technical Support Analyst

Mar 2021 to Jan 2023

Aptive Environmental - Provo, UT

- Resolved ~100 escalated tickets per week.
- Managed and imaged 700+ workstations using automated cloning and deployment tooling, standardizing endpoint configuration across the fleet.
- Delivered white-glove experience for executive devices.
- Processed ~10 hardware provisioning requests weekly, supporting device deployment and inventory.
- Authored 41 knowledge base articles covering KPI definitions, IT procedures, and troubleshooting guides.

Scripting Software Specialist & Tech Support

Sep 2018 to Mar 2021

Slingshot - Orem, UT

- Designed and shipped a custom Five9 IVR scripting system that let Slingshot resell low-cost (\$1/mo) phone numbers to clients as trackable "Marketing Numbers," automatically tagging inbound calls with lead-source attribution per campaign. The feature became a premium-tier upsell driver, generating 25%+ ROI for the business.
- Managed identity and access for 250+ user accounts across Google Workspace and other SaaS tools.
- Served as primary technical support contact for 20+ high-priority clients
- Built IT demo content and documentation, including knowledge transfer during ticketing system migration.
- Produced operational reports to forecast staffing needs and maintain ~100 Five9 seat allocations.
- Integrated software systems to unify KPI reporting and improve operational accuracy.
- Provided remote support for executive Apple and Windows mobile devices.
